

# Dinosaur Discovery Camp (Summer 2024)

Embark on a prehistoric adventure like no other at our Dino Discovery Summer Camp, specially designed for preschoolers! Get ready to journey back in time and explore the fascinating world of dinosaurs.

## Camp Overview:

At Dino Discovery, young paleontologists will immerse themselves in a hands-on learning experience filled with excitement, creativity, and discovery. Our camp offers a safe and nurturing environment where children can unleash their curiosity and imagination while making new friends. We will even learn about dinosaurs that once lived in our own Alaska backyard.

## Activities Galore:

Each day brings a new adventure as campers engage in a variety of dino-tastic activities:

1. **Dino Digs:** Grab your shovels and brushes as we excavate fossils and uncover hidden treasures in our simulated dinosaur dig site.
2. **Crafty Creatures:** Let your creativity run wild with dinosaur-themed arts and crafts, from making fossil imprints to creating our own dream dino!
3. **Roaring Storytime:** Dive into the world of prehistoric creatures through captivating stories and interactive and shared storytelling sessions.
4. **Dino Dance Party:** Shake your tail feathers and stomp to the rhythm of dino-themed music at our epic dance and rhythm parties.
5. **Jurassic Jamboree:** Join us for games, puzzles, and team-building activities that will make you feel like a true dinosaur explorer.
6. **Snack-o-saurus:** Bring your appetite for dino-themed snacks that will transport us back in time.

## Creative Expression:

Campers will have plenty of opportunities to express themselves through drama, music, and imaginative play, all inspired by the fascinating world of dinosaurs.

## Expert Guidance:

Our certified teachers are enthusiastic about learning and dedicated to providing campers with a fun and educational experience for all. Safety is our top priority, and our teachers are trained in first aid and CPR.

## Friendship and Fun:

At Dino Discovery, we forge friendships and learn how to work as a dino-mite team! Collaborative and cooperative skills are vital for any paleontologist.

Spaces are limited, so reserve your spot now and get ready for a summer of roaring good times!
